## EDUCATION

IMS Engineering College, Ghaziabad

Master of Computer Applications (MCA) - **CGPA - 9.1**

**2024 – Present**

Ghaziabad, Uttar Pradesh

SIGNA College, Kanpur

Bachelor of Computer Applications (BCA) - **CGPA - 7.8**

**2021 – 2024**

Kanpur, Uttar Pradesh

## EXPERIENCE

Intern at KoiReader Technologies

**Feb 2026 - Present**

Role - Python Developer

Bengaluru, Karnataka - Remote

- Designed and implemented end-to-end computer vision pipelines using Python and OpenCV.
- Applied advanced image augmentation techniques using Albumentations and Imgaug to improve model generalization.
- Trained and tested YOLO-based object detection models for vehicle and license plate detection.

Intern at CodeAlpha [↗](#)

**Aug 2025 - Sep 2025**

Role - Back-end Developer

Remote

- Improved API response time by 30% through Django ORM optimization and PostgreSQL indexing.
- Designed **4 RESTful APIs** for a task management system with authentication and authorization modules.
- Managed PostgreSQL database operations and implemented responsive UI using HTML, CSS, and JavaScript.

## PROJECTS

College ERP System [🔗](#) | Python, Django, PostgreSQL, JavaScript, OAuth

**June 2025 - July 2025**

- Architected a comprehensive ERP solution for educational institutions featuring role-based access control.
- Implemented JWT-based authentication and OAuth 2.0 integration to strengthen application security.
- Optimized database schema design, achieving 50% faster query performance for academic data processing and reporting operations.

AI Career Counselor [🔗](#) | Python, Django, PostgreSQL, JavaScript

**Aug 2025 - Sep 2025**

- Developed an AI-powered career counseling platform using Django and PostgreSQL to guide users in career planning and growth.
- Implemented secure authentication using JWT and OAuth, along with link-based password reset functionality to enhance user security.
- Optimized database schema design resulting in 30% - 40% faster query execution for academic data operations.

OpenSource Lens [🔗](#) | Django, Python, GitHub API, Open Source, VS Code

**Jan 2026 - Present**

- Built an open-source Django web application to track and visualize GitHub contributions, including repositories, pull requests, and issues.
- Implemented GitHub OAuth authentication and integrated multiple GitHub APIs to fetch real-time contribution data.

## TECHNICAL SKILLS

**Languages:** Python, C/C++, SQL (Postgres, MySQL), JavaScript, HTML, JSON, CSS

**Frameworks** Messaging jQuery, Flask, Django, Django Rest Framework, Bootstrap, RabbitMQ

**Tools, Platforms:** Git/GitHub, Docker, Linux, Google Cloud Platform, VS Code, PyCharm, Render

**Others :** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Cloud Computing

## CERTIFICATIONS

- GeeksforGeeks 160-Day DSA Challenge – GeeksforGeeks
- C++ Essential Training – LinkedIn Learning
- Python Programming Certification – Great Learning

## OPEN SOURCE CONTRIBUTIONS

Open Source Contributions

[djangoproject.com](https://djangoproject.com) — Adenhq(hive)

Community Contributor

**2025 – Present**

- Identified, analyzed, and reported verified bugs in large-scale open-source Django projects, improving code quality and stability.
